

Chemical Protection ESK 2 series

TYP ESK 2 POLYRAN-L / POLYRAN-T

Suit description ESK 2 P-L:

Single piece protective suit with hood with a cut-out that fits tight around a respirator full face mask, covered front zip fastener with hook and loop as well as arm and leg endings with integrated elastic bands. All seams are tightly welded. This makes the suit washable and reusable.

POLYRAN – L Material description:

The suit material is a highly flexible, tear-resistant polyester weave with double-sided coating made of POLYRAN-L. The good chemical resistance and the high mechanical resilience offer extensive protection for the suit wearer.
Colour: Red

Weight: Approx. 1 kg
Type class: Cat III / Type 4 – 6

Order data:

Size	Number
S-XL	0199-151
XXL	on request

POLYRAN – T Material description:

The suit material is a highly flexible, tear-resistant polyester weave with single-sided coating made of POLYRAN-T.
Colour: Yellow

Type class:
Cat III / Type 3 –6 – International: Level B

Order data:

Size	Number
• S-XL	199-150
• XXL	on request

TYP ESK 2 TSO / ESK 3 TSO plus

ESK 2 TSO: Suit description:

Single piece protective suit with hood, covered front zip fastener with hook and loop seal, as well as arm and leg endings with integrated elastic bands. Increased chemical resistance through the material construction (see figures) and high mechanical resilience. Therefore, the suit offers extensive protection for the suit wearer.

- Seams:** covered, heat-sealed
- **Colour:** Signal orange
 - **Standard sizes:** M, L and XL
 - **Special sizes:** XXL (please quote when ordering)

ESK 2 TSO: Suit description:

See ESK 2 TSO, but with throat-splash protective flap and welded seams, inside and outside. This protective suit can be reused, with limits.

TSO Material description:

The TSO plus material has a multi-layer construction, laminated with SARANEX®. SARANEX® is a thermoplastic, multi-layer barrier foil and is made up of one layer of SARAN® (PVDC = Polyvinylidene chloride), which is embedded between an layer of low-density polyethylene (LDPE) and a layer of ethylene vinyl acetate copolymer (EVA-copolymer). A further PE foil joins the SARANEX® with the polyethylene fleece.

TSO plus Material description:

See TSO, however the inside of the material is coated with liquid PU.

Weight: Approx. 1 kg
Type class: Cat III / Type 3
International: Level B
Order number TSO: 01 99-224

Order number TSO plus 01 99-1 63

SARANEX® is a registered trademark of DOW Chemical®
