

Chemical Protection ESK 1 series

ESK 1 T

Suit description:

- Protection against radioactive dust
- Ergonomically designed hood with elastic band
- Zip fastener up to the chin
- Double zip fastener cover (inside and outside)
- Elastic bands at the arms, legs and waist (back)
- No seams on the shoulder and upper arm (minimal number of seams)
- Special, 4-layer polypropylene fleece – particularly flat and breathable
- Perfect design even at critical positions

Material description:

The material used is a new, 4-layer polypropylene spun fleece, whose excellent properties have been certified by the Textile Research Institute of Saxony. Particularly impressive are the values for resistance to wear, its tensile strength and its seam line strength, giving a long working life. Particular protection is given by the high dust-tightness and the excellent resistance index against numerous water-soluble chemicals. In spite of these superb properties, the material is extremely comfortable to wear.

Type class:

Usage: PPE, in the category 3 / Type 5 - 6
International: Level B

Order data:

Size	Number
S-XXL	0290-195*

ESK 1 T plus

Suit description:

- Protection against radioactive dust
- Ergonomically designed hood with elastic band
- Zip fastener up to the chin
- Double zip fastener cover (inside and outside)
- Elastic bands at the arms, legs and waist (back)
- No seams on the shoulder and upper arm (minimal number of seams)
- Special, 4-layer polypropylene fleece – particularly flat and breathable
- Perfect design even at critical positions

Material description:

The material used is a new, 4-layer polypropylene spun fleece, whose excellent properties have been certified by the Textile Research Institute of Saxony. Particularly impressive are the values for resistance to wear, its tensile strength and its seam line strength, giving a long working life. Particular protection is given by the high dust-tightness and the excellent resistance index against numerous water-soluble chemicals. In spite of these superb properties, the material is extremely comfortable to wear.

In comparison to the T- model, the T plus stands out because of its welded seams and an additional external coating.

Type class:

Usage: PPE, in the category 3 / Type 4 - 6
International: Level B

Order data:

Size	Number
S-XXL	0290 - 196*
S-XXL with sock liners	0292 - 196*
