

# F9 FIREBREAK DUO

“ A NEW DIRECTION IN HOW FIRE HELMETS ARE USED”

The F9B1 helmet is a multipurpose helmet designed to cover many scenarios.

- A. Bushfire/Wildfire operations
- B. Defensive fire fighting
- C. USAR
- D. Height Rescue
- E. Chainsaw operations
- F. Rescue tool operations
- G. Other non structural fire operations

F9B1

F9B1

The F9B1 has the following features:

- 1. New trampoline comfort suspension harness
- 2. New neck protector
- 3. Nomex 3 point Q/R chinstrap
- 4. Ear muff clips
- 5. Easi glide torch base
- 6. Rear hanger
- 7. Drilled for attaching new ESS fire goggle
- 8. Set up for attachment of new Vulcan in-helmet communications
- 9. Clips for attaching F9S2 structural fire helmet skin
- 10. Certified to AS1801 Type 3

F9S2

F9S2

\*\*Note: The F9S2 skin is not personal issue.

The F9S2 Clip-On Structural Skin has the following features:

- 1. Allows the F9B1 to become a full structural fire helmet
- 2. 3mm polycarbonate visor attached
- 3. Non personal issue
- 4. Rear hanger
- 5. Easi-Glide torch base fitted
- 6. The F9S2 cannot be worn unless attached to the F9B1 helmet
- 7. When combined with F9B1 the complete unit is certified to AS4067

\*\*Note: We suggest the F9S2 skins are stowed on the trucks as they are not personal issue.
