

Premium BioActive Absorbent

EcoSweep®

from the earth...

All Natural...

EcoSweep is manufactured from a special selection of Australian grown organic cellulose products. These natural fibrous materials are blended and processed to produce a range of absorbents that quickly absorb a wide variety of liquids, including petroleum, oils, fuels, solvents, cooking oils, sewage, protein fluids and other messy liquids that could pollute or contaminate the work area.

EcoSweep is unique in that its fine granules are hollow - which means they rapidly encapsulate the liquids so there is no leaching back into the environment. Known as the "wicking effect", once liquids are absorbed, they are consumed into capsules and cannot separate or drip.

Cat No: SAB10

Dispose to Landfill...

EcoSweep is inoculated with bioactive microbes for the bioremediation of hydrocarbons - that literally 'eat and digest' oils - gradually converting into a soil conditioner within a few weeks.

Many regions allow EcoSweep to be disposed of to landfill: but this should be checked according to each region's local regulations.

EPA Compliance...

EcoSweep passes USEPA Paint Filter Liquids Test Method 9095A, the standard recommended by EPA Operational Policy. (Determinations: Schedule 7)

EcoSweep Products Available...

- ECOSWEEP 10kg BAG Cat No: SA10
- ECOSWEEP 2.5kg BAG Cat No: SA2.5
- ECOSWEEP 2.5kg JUG Cat No: SAJ2.5
- ECOSWEEP 10kg HANDY BUCKET Cat No: SAB10
Comes in a 20L Pail with Scoop
