

Hydrocarbon Spill Kits (Fuel & Oil)

Why is a Spill Kit necessary?

Because, according to the EPA there is a duty of care that falls upon all persons:

While EPA guidelines may vary slightly from State to State, the EPA uniformly: **“imposes a general environmental duty on all persons undertaking an activity that may pollute, requiring them to take all reasonable & practical measures to prevent or minimise any resulting environmental harm.”**

Discharging any of the following pollutants is prohibited:

“a person must not discharge or deposit a pollutant listed in Schedule 4 of the Policy into any waters or onto land where it might enter any waters. The pollutants listed include:

- agricultural chemicals
- engine coolant
- motor vehicle servicing & repair waste
- cleaning agents
- solvents
- oil, grease, lubricants & petroleum products
- detergents & their by-products
- rubbish

What type of products are in the Spill Kits?

Ecospill has specifically designed Hydrocarbon Spill Response Kits suitable for all fuel & oil spills. Every **ecospill** Hydrocarbon Spill Kit contains sufficient PPE (Personal Protective Equipment), Spill Clean Up Instructions, as well as:

BioActive Absorbent Powder

- EcoSweep - standard spill kits - or -
- SNOW Absorbent - premium range

Absorbent Mats

Thick White Absorbent Mats that absorb fuel & oil, but not water. Suitable for marine applications.

Land Socks

1.5m & 3m in length, these socks are placed around the perimeter of the spill, in order to contain it.

Transport Spill Kits

In a convenient Carry Bag, perfect for Truckies, Bus Drivers & Mobile Technicians. Available in 20L, 40L & 100L sizes.

20L TRANSPORT KIT
Cat No. HC20

40L TRANSPORT KIT
Cat No. HC40

100L WATERPROOF KIT

Cat No. HCW100

Automotive Spill Kit

In a Wheelie Bin, this general purpose kit is ideal for fuel & oil as well as coolants.

Cat No. HCA120

Service Station Spill Kit

Fitted with a Clip Lock for protection against unwanted rubbish. Optional Bin Hood is available for weather protection.

Cat No. HCSS120

Workshop Spill Kits

Ideal Spill Stations for small to large Industrial Workshops. 120L, 240L & 400L sizes.

120L H-CARBON SPILL KIT

Cat No. HC120

240L H-CARBON SPILL KIT

Cat No. HC240

240L PREMIUM SPILL KIT

Cat No. HCPR240

Premium Hydrocarbon Spill Kits

The newest addition to our spill kit range, these Premium Hydrocarbon Spill Kits contain SNOW Universal Absorbent. SNOW is a unique, re-usable, powerful absorbent powder that not only absorbs fuel & oil spills, but also absorbs paint, vegetable, mineral & most chemical liquid or semi-liquid spills. (The only exception being Hydrofluoric Acid).

SNOW Universal Absorbent will not leach or drip. It easily removes old paint & oil stains in concrete (especially when used in combination with Snow Primer - available separately).

Premium Kits Available:

- 20L TRADESMAN KIT Cat No. SNTM20
- 20L PREMIUM TRANSPORT KIT Cat No. HCPR20
- 120L PREMIUM H-CARBON KIT Cat No. HCPR120
- 240L PREMIUM H-CARBON KIT Cat No. HCPR240
