

Heat Protection Suit Typ VSF 11 with external air system (HS10-210)[®]

The VSF 11 is a full covered protection suit for the employment person with a integrated external air system (without a PSA).

The air supply is made by a 360° circulate, flexible high-grade steel air execution, which is left in waist height and has a mountingstrap for strain relief.

Via connection of our breathing air hose over the safety coupling the air supply can be made by one of our air conditioning stations. In the suit inserted valves provide for pressure balance.

With a zip-fastener (130 cm long) which is liquid dense and gas proofed, running on the side right which has got an additional labyrinth covering, it is possible to put on and store the protection suit simple and fast.

interchangeable safety boots EN 345 S5 and a interchangeable 5-fingered glove system (150° contact heat – for work at higher temperatur, we recommend an additional glove to worn over the sleeve and covered by an outside gauntlet).

Material: HS 10-210

- Multy-layered material compound out of a spezial glass fabric
- High vacuum-aluminized
- With included TEFLON* as a chemical insulating providing additional steam resistance
- With insulating out of KEVLAR* and additional lining

Weight: approx. 7,5 kg

Standard size: fits all heights up to approx. 190 cm

Order No.: 0311-210
