

VS 5 POLYRAN -S

Chemical protection suit (CSA)

>VS 5 POLYRAN-S<

Complete protective suit for a person wearing breathing equipment, the model allows a fireman's helmet or a big breathing helmet, a fire brigade protective suit, a mask and a compressed air equipment to be worn underneath. Therefore the backside of the suit is a rucksack for the compressed air equipment. The suit contains two covered excess pressure valves and built in tubes for deliverable braces (suspenders) belong to the presentation of this protection suit.

With a 130 cm long, liquid and gas resistant zip on the right side, made of high-grade steel, covered. Replaceable gloves and safety boots. With a large visor by POLYRAN suits with non-misting pane. We produce the suits in a standard size up to approx. 190 cm.

Ent.prEN 943-1/2, 8/96 DMT Prüfb.-Nr. 2537/97

The braces (suspenders) are available on request and enable the suit to be adjusted to fit smaller people. The braces (suspenders) also allow the even distribution of weight and relieves neck, head and shoulders.
