

VS 5 Sykan 3

VS 5 SYKAN® 3

Chemical protection suit (CSA) VS5 SYKAN® 3

Presented as a full protection suit with built in anti-mist face shield and outer shield made of FEP(TEFLON®), so designed to enable helmet and breathing apparatus to be worn under. With a 130 cm long liquid and gastight zipper under a labyrinth cover on the right hand side. Covered pressure valves, changeable safety shoes (S5a DIN 4843), changeable five finger gloves (DIN 4841 F3) and built in tubes for deliverable braces (suspenders) belong to the presentation of this protection suit.

The protection suit has a liquid and gas proof finish. The suit reaches VFDB standard 0801 and 0802 and is certified (CE 0158).

The braces (suspenders) are available on request and enable the suit to be adjusted to fit smaller people. The braces (suspenders) also allow the even distribution of weight and relieves neck, head and shoulders.

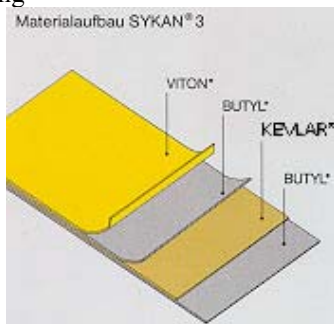

US patent No. 5133092 / DGBM G9001497.0 / EP 0440954
VS 5 SYKAN® 3

Order No. 0201-213

DMT-tested, certified and licensed, also combination with HMK systems:

- „Supra“ Firma Drägerwerk AG, Lübeck
- „F200“ Firma Auergesellschaft GmbH, Berlin
- „Heros“ Firma Rosenbauer Österreich GmbH, Leonding

see also Chem-Permeation list

SYKAN® 3 has best chemical and gas resistance by a 4-layered material structure.

DGBM G 8913473.7 EP 0432492 and US-Pat. No. 5.119.515

The fabric contains KEVLAR® and thus provides protection from handling chemicals and flammable gases. Also in extrem cold conditions, SYKAN® remains supple and will not crack or break (technical changes reserved).
