

When pipes burst without warning, Vetter Leak Sealing Bandages staunch the leak quickly and reliably, protecting people and the environment from out-flowing pollutant and poisonous liquids. The leak patches are especially advantageous for sealing pipe leaks in the most awkward and inaccessible places. They have proved their effectiveness time and again, on pipe diameters from 5 cm up to 48 cm (2 to 19 in.)

VETTER Leak Sealing Bandages 1.5 bar

APPLICATIONS:

For sealing leaks on pipes and round containers in the diameter range from 5 to 48 cm (2 to 19 in.)

For staunching long tears in the side of a tank

SIZES:

2 sizes 98 and 177 cm (39 and 70 in.) long for diameters from 5 to 20 cm (2 to 8 in.) and from 20 to 48 cm (8 to 19 in.)

ADVANTAGES:

Leak sealing on very small pipe diameters

Sealing round the entire pipe-circumference

Reinforced, low-stretch top surface, but highly stretchable sealing surface

Leak Sealing Bandages can be placed to their full length (up to 177 cm [70 in.]) over a long hairline crack, secured in position by square timber and ratchet tensioning belts, and inflated to seal.

SAFETY:

Brief operating instructions on product label

1.5 bar (21.75 psi) coupling system compatible with all leak stoppers and accessories

Tested at working pressure of 1.95 bar (28.5 psi)

Single controller with pressure gauge, safety valve and shut-off unit to prevent inadvertent over-inflation
